

Saluting Cartridges 105 mm

- No smoke – less pollution of the cannon
- Precious appearance
- Transport classification 1.4C for shipment by air
- NATO-registered
- One-piece shell

State receptions, royal birthdays, on the occasion of Ramadan celebrations, public holidays, commemorations, traditional events, etc. On a wide variety of occasions, the importance of the event is underlined and highlighted with gun salutes. They are without exception blank shots without a projectile, which merely produce a report, possibly in conjunction with smoke.

Both the guns and the cartridges do not have any offensive or defensive capability.

Product Description

Our saluting munition fires **smokeless**, which is a great advantage in the maintenance of the gun. In addition, the shooting place does not become smoke-logged after firing multiple shots.

If desired, we can also produce munitions with coloured smoke.

For this calibre we can offer aluminium case (brass only for high quantities and recurring deliveries only). They can also be delivered anodised golden.

Saluting cartridges product range with primary packaging (cardboard container)
